

Transcript: Live Five-Number Summary

And this is just a picture of how the five-number summary works.

The five-number summary gives me the min, max, the median - which is the 50th percentile it's another quartile - it's the one in the middle.

This is the first quartile Q1, the median is the second quartile, the 50th percentile, and Q3 is the third quartile, the 75th percentile.

And this divides the data into equal groups of 25 percent
